

Ryan Biondo

Front End Developer

Colorado Springs, CO | dev@ryanbiondo.com | ryanbiondo.com

CAREER SUMMARY

Dedicating my focus towards front-end development, I am transitioning out of a decade of leadership in restaurant management. I've built a solid foundation in HTML5, CSS3, JavaScript, and am continually enhancing my skills in TypeScript and React. As a manager, I've proven my ability to build teams, drive productivity, and adapt quickly to new situations.

SKILLS AND STRENGTHS

- HTML5
 - CSS3
 - JavaScript
 - TypeScript
 - React.js
 - Git
 - Responsive Design
 - Creative Problem-Solving
 - Teamwork Oriented
 - Adaptability
 - Excellent Communication Skills
-

Projects

The Code Quiz: Designed to help programmers of different levels test their knowledge in CSS and JavaScript. Created using React.js, the application features a dynamically updating question and answer interface that is powered by remote API. Key features include responsive design, utilization of React Context for state management, and the deployment of both front-end and back-end via separate repositories for an optimized production environment. The project was initially developed using a monolithic structure and later separated into a multi-repository structure during deployment, exemplifying my understanding and experience with different project organization methodologies. Professional Brand Dashboard: Collaboratively developed with Sean Craig Creative. It centralizes and navigates brand guidelines. Executed pixel-perfect translation of the professional designer's vision into an interactive web experience. The project showcased brand positioning, logos, identity assets, and touchpoints. Worked extensively with HTML, CSS, and JavaScript to ensure design accuracy, responsive behavior, and interactivity. The successful launch improved brand accessibility, receiving positive feedback for usability and design accuracy. [GitHub Link](#) – [Demo Link](#)

WORK HISTORY

General Manager, Subway (June 2022 – Present)

- Supervised a team of 8, consistently conducting performance reviews and constructive feedback sessions, demonstrating strong communication and leadership skills
- Successfully navigated equipment challenges to maintain operations, showcasing problem-solving and strategic thinking abilities. Utilized cross-store collaborations and strategic inventory management, demonstrating effective project management and team collaboration skills.
- Achieved the first successful health inspection in 4 years by strictly adhering to health standards, reflecting attention to detail and dedication to excellence.

Fulfillment Operations Lead, Folium Biosciences (Aug 2018 – Aug 2022)

- Led a team of 10 in a clean room environment, keeping strict cleanliness standards. My leadership and team management skills were pivotal in ensuring operational excellence.
- Authored and edited Standard Operating Procedure (SOP) documents, effectively introducing a standardized set of procedures for the fulfillment team in areas that lacked documentation.
- Volunteered as a member of the Safety Committee to represent my team.
