Ryan Biondo

Front End Developer

Colorado Springs, CO | dev@ryanbiondo.com | ryanbiondo.com

CAREER SUMMARY

Dedicating my focus towards front-end development, I am transitioning out of a decade of leadership in restaurant management. I've built a solid foundation in JavaScript, TypeScript and React.js and I'm ready to apply them in a tech setting.

SKILLS AND STRENGTHS

- HTML5
- CSS3
- JavaScript
- TypeScript
- React.js

- Responsive Design
- Creative Problem-Solving
- Teamwork Oriented
- Adaptability
- Excellent Communication Skills

PROJECTS

The AstroPix Gallery: Showcases images sourced from NASA's Astronomy Picture of the Day, built using React, Chakra UI, React Query and React Router. The calendar is imported from date-picker and synchronizes the date with the chosen picture. Utilized Chakra UI components for styling and responsiveness, and generic custom hooks for modular structure. The integration of infinite scrolling and other navigation features provide users with a platform to enjoy and learn about astronomy.

The Code Quiz: A tool for front-end developers to sharpen their skills in CSS and JavaScript. Created using React.js, features a dynamically updating quiz interface and React Context for state management. The project was initially developed using a monolithic structure and later separated into a multi-repository structure during deployment.

WORK HISTORY

General Manager, Subway (June 2022 – Present)

- Supervised teams of up to 8, consistently conducting performance reviews and constructive feedback sessions, demonstrating leadership skills and improving employee performance.
- Successfully navigated equipment challenges to maintain operations. Utilized cross-store collaborations and strategic inventory management, demonstrating team collaboration skills.
- Achieved the first successful health inspection in 4 years by strictly adhering to health standards, and have maintained them since, reflecting my attention to detail.

Fulfillment Operations Lead, Folium Biosciences (Aug 2018 – Aug 2022)

- Led a team of 10 in a clean room environment, keeping strict cleanliness standards.
- Authored and edited Standard Operating Procedure (SOP) documents, effectively introducing documentation for the fulfillment team in unprecedented operations.
- Volunteered as a representative of the Safety Committee. Addressing major concerns and increasing morale for my team.
